

PRODUCTS & SERVICES

Pinnacle Series is Eagle Point's full-featured AEC e-learning system and features expert-developed software training for dozens of programs in the AEC space. Organizations can customize content to fit company standards, upload internal documentation and training videos, control the look and feel of the Pinnacle interface, give assignments and monitor employee progress, create private groups and invite external users, and more.

Pinnacle Lite is a scaled-down version of this core AEC e-learning system for companies with up to 25 users. It offers access to the same AEC software training content (videos, courses, workflows, and learning paths), with fewer features. Pinnacle Lite is a favorable option for small or mid-sized companies looking solely for high-quality training content and productivity tools rather than a full-featured e-learning system.
